

From reports coming in from around the country, it would appear that the government is preparing to stage another million dollar trial, the third in its abortive attempts to destroy William F. Kock, M. D., Ph. D., M. A., of Detroit, Michigan. The continuance of the persecution of this able physician by the government evidences the infiltration into politics of the medical racket. Dr. Koch was offered a million dollars for his formula by organized medicine before he gave it to the medical profession. Not that they wanted to use it, but that they might kill it as interfering with their own questionable methods. Hoxsey, I believe, could tell a similar story.
